Advice and Actions

2. For patients with insufficient supplies of their oral contraceptive to last until the resupply date, clinicians should consider prescribing an alternative OCP following the advice contained in this MSAN (see summary table and additional information).
3. Where unlicensed imports are deemed appropriate, prescribers should work with local pharmacy teams to ensure orders are placed within appropriate time frames as lead times vary (see additional information),
4. Clinicians (both prescribing and dispensing) should counsel patients regarding the different brand and dosing regimen prescribed, where appropriate.
5. Specifically for patients with insufficient supplies of Synphase® tablets to last until the resupply date, prescribers should consider prescribing:
 - an alternative phasic oral contraceptive (see additional information below):
 - an alternative non-phasic oral contraceptive; or
 - an unlicensed import of Synphase® tablets (see additional information below).

Additional Information

Guidance on ordering and prescribing unlicensed imports:

6. The following specialist importers have currently confirmed they can source unlicensed Synphase® tablets with variable lead times (please note, there may be other companies that can also source supplies):

Synphase® tablets	Eloine® Tables
Clinigen	Alium
Mawdsleys Unlicensed	Target
Target Healthcare	Durbin
	Mawdsleys

7. Any decision to prescribe an unlicensed medicine must consider the relevant guidance and NHS Board or local governance procedures. Please see the links below for further information.
 - [Prescribing unlicensed medicines](#), General Medical Council (GMC);
 - [The supply of unlicensed medicinal products](#), Medicines and Healthcare products Regulatory Agency (MHRA);
 - [Professional Guidance for the Procurement and Supply of Specials](#), Royal Pharmaceutical Society (RPS).

Clinical Information

8. **Guidance providing evidence-based recommendations and good practice points for health professionals on the use of combined hormonal contraceptives is available from the [Faculty of Sexual & Reproductive Healthcare \(FSRH\)](#).**
9. For further information on the constituents of phasic oral contraceptives, see the table below:
